50X1-HUM

n. A destroyer of 1,000 tons is being built in Rijeka at the "Cantieri de Quarnaro" (Quarnaro docks). The necessary engines for this boat will be salvaged from a sunken Italian torpedo-boat in Rijeka harbor.

2. A plan is being studied at the Navy HQs at Split (which has the function of the Navy Staff) with the assistance of Russian expert, to block the Otranto Straits to prevent the entry of Allied ships into the Adriatic. In the Adriatic at the Yugoslav-Albanian border, the laying of mines has already begun.

3. Naval Radio Stations [REDACTED]

Rijeka -Radio Station Northern Adriatic Command
Split -Naval Radio Station, intercepting station, coding station
Sibenik -Radio Station for Fleet Command and Central Adriatic Command.
Tivat -Radio Station Lower Adriatic Command.

50X1-HUM

50X1-HUM

- a. Apparatus: S.C.R. [redacted]
Allocchio-Bacchini short wave
Lorenz 50 watt
Campali 40 watt
- b. There are only two wireless direction sets for medium waves on the corvette PARTIZANKA and on the yacht BIKOVO. The ships use [redacted] transmitters Radio 12, for stabilized waves at 50 watts.
- c. Procedure for radio messages between Yugoslav Navy and coastal radio station:

Call signs (ships and coastal stations) change at irregular times following a time table established by Naval HQs. The tables are fixed for certain times; during these times, ships and coastal stations use frequencies also established in another table. The frequencies, which are between 3,000 and 5,000 KC/s, change every two weeks. For example; NY (ship) at 0830 on 3450 KC/s calls CL (coastal station). CL answers on another frequency established for that hour. NY, after having received the "K" sends his message on his frequency. During messages and usually before beginning, both ship and station exchange code word. This changes for each period and to each there is a counter code word which can be used, as the radio operator wishes. The system is Russian.

4. Naval Intelligence Service

HQs of Naval Intelligence is at Split

CO - Colonel Jovanovic

Intercepting and coding sections are located at Naval HQs (ex-Palazzo del Bano).

[redacted] naval messages are monitored.
